

# ELEVATING THE DIVERSITY OF COOL

The First Name In Trailers®

## MULTI-TEMP

A Utility Multi-Temp is an expression of personalization. A vast number of options are available, and they can be configured in order to build a trailer ideal for your specific application. At Utility, customization is the principle of performance.

#### Severe Service Kingpin Section

Engineered with a thicker approach plate and kingpin plate, this design minimizes damage during heavy-duty service operations, reducing repair costs.

#### Stainless Steel Wingplates

Designed with collared holes and embossed ribs to minimize maintenance expenses from road de-icing chemicals, improving overall image.

#### Stainless Steel Vertical & Horizontal Dock Bumper

Easy-to-clean, corrosion resistant stainless steel dock bumpers create a clean look that increases resale value and extends trailer life.

#### Walk Ramps From All Major Suppliers

Most manufacturers' ramps are available for factory installation in both side and rear door configurations for greater ease in loading and unloading.

#### Anti-Dock Walk Devices & Dump Valves

A variety of anti-dock walk devices and dump valves may be used to stabilize the trailer during loading/unloading, creating a safer work environment.

#### Tire Inflation Systems

Choose one of our recommended systems and maintain optimum tire pressure in order to increase fuel economy, improve safety and maximize tire life.

#### Electrical System Options

Various clearance light packages, tracking systems, remote thermostats, tire pressure-monitoring systems and other advance technologies are available.

#### Air Return Bulkheads

A number of air return bulkheads are available to fit all types of refrigeration units. Several different styles of pallet stops are also available.

#### CenterSeal® Load Partition Device

The thermally efficient CenterSeal load partition device allows for multiple zones inside a trailer for increased load versatility and efficiency.

#### Electric Stand-By Refrigeration Units

Operating an electric stand-by unit during pre-cooling or when stationary yields significant fuel savings that adds to your bottom line.

#### Factory-Installed Refrigeration Units & Accessories

Utility installs all models of refrigeration units, both standard single temperature units and all versions of multi-temp refrigeration units.

#### Front Corner Protectors

Aluminum diamond plate protectors protect against potential high clearance obstructions, reducing maintenance and repair costs and increasing trailer life.

#### Multiple Strip Curtain Configurations

Strip curtains at side or rear doors decrease fuel consumption costs and provide greater temperature control by minimizing air loss.

#### Multi-Temp Load Partition Systems

Multiple trailer compartment configurations protect temperature sensitive cargo and increase trailer utilization for better operational efficiency.

#### Remote ERC Switches

Shuts reefer unit off when an open door exposes the inside of the trailer to the ambient environment, maximizing fuel savings.

#### Remote Evaporators

Factory-installed remote evaporators are available in a variety of locations for all multi-temp trailer requirements.

#### Shore Power Plug at Rear

The industry's best plug and wiring system, it delivers greater fuel savings during operation and improves safety with multiple grounding features.

#### Temperature Management Systems

Multiple systems are available at the factory with both preparation and/or installation to protect products and ensure quality during transportation.

#### Exterior Rub Rails

Constructed from heavy-duty aluminum, they protect the exterior side skin from casual damage, reducing maintenance costs.

#### Grab Handles

Stainless steel, aluminum and chrome grab handles are available in a variety of styles for improved driver safety.

#### Roll Up Door Installations

Utility offers roll up doors from most manufacturers to meet the unique applications of your operation.

#### Stainless Steel Electropolished Lock Rods

Electropolished stainless steel produces a corrosion resistant, easy-to-clean polished finish for improved appearance and increased resale value.

#### Tri-Fold Rear Doors

Barrier design is for tight clearance conditions in order to meet the need for a smaller door opening and lower heat loss.

#### Factory-Installed Rear & Side Door Lift Gates

Utility offers high quality lift gate installation from most manufacturers to provide you a fully operational trailer direct from the factory.

### Retractable Platforms & Stairs

A wide variety of platforms, stairs and steps, from leading manufacturers, are available for better access to the trailer from the side doors.

### Side & Rear Steps

Available from most manufacturers in a variety of styles, side steps and rear steps improve operator safety and provide ease of accessibility.

### Custom Positioned Side Doors

Doors can be positioned in a variety of locations in order to increase compartment accessibility and meet your specific requirements.

### Customized Floor Systems

Various systems are available such as dairy or knurled styles, and extended service floors with extra-thick upper wear surfaces in both duct and flat top dry freight styles.

### Custom Wearbands

Multiple heavy-duty aluminum, fiberglass reinforced plastic and HDPE plastic options are available to fit your operation's durability requirements.

### Recessed Logistic Track

Recessed logistics track allows you to use a variety of load restraining devices (straps, load bars, etc.) without sacrificing inside width.

### Severe Service High Impact Linings

Additional thicknesses of high impact linings from multiple suppliers are available for severe service operations.

### Verta-Lock® Vertical Shoring System

**PATENTED** A Utility exclusive, this patented floor-to-ceiling load restraining system is used with specially designed spring loaded vertical shoring bars to hold loads firmly in place.

### Clearance Light Packages

An array of LED clearance light models and configurations are available to meet the specific needs of your operation.

### Factory-Installed Decals

The highest quality decal installation available is completed at our factories so your trailer is ready to operate as soon as you pick it up.

### LED Dome Lights

High output LED lights have lower current draw, increased life and operate equally well in both high and low temperatures.

### Air Disc Brakes

This brake system reduces brake fade, increases braking performance and improves safety – creating shorter, more stable stopping distances. With an extended service life, lower maintenance costs and downtime, air disc brakes are increasingly the industry's preferred choice.
