

PROVEN EFFICIENCY

The Most Versatile Trailer On The Road.

The Tautliner® Truck Body allows for simultaneous accessibility from both sides, the rear, and from both raised and ground level docks. You'll load and unload faster than ever before and never have to worry with first-on, last-off load planning. As your efficiency increases, costs decrease. Flexible, load-bearing curtains allow you to load up to the full width of the body, and they protect your cargo just like a van. There's no better way to increase payloads.

Curtain Tensioners, Straps, and Buckles

Our Tautliner® curtains feature individually pocketed, 3,000 pound tensioning straps with stainless-steel buckles every 24" on center. Curtain tensioners are positioned at both front and rear for maximum versatility and load access.

The Quality's In The Details

Beginning with the floors, Utility uses dry van style 4" deep hi-tensile steel cross members on 12" centers and a full 1-1/8" laminated hardwood floor. The resulting 12,000 lb. Fork truck rating provides the versatility and durability you need, built Utility strong.

Heavy-Duty Rear Door Frame

The rear door frame of our Truck Body comes standard with the durability and strength you have come to expect from Utility. Massive 7/16" thick extruded aluminum rear corner posts provide additional rear frame stiffness and greater body integrity.

Front Corner Posts

The extra-strong 5/16" thick heavy-duty aluminum extruded front corner posts further reinforce overall structural integrity. For added roof stiffness, the upper rail is a full 6" deep aluminum extrusion.
