

# GET SMART

UTILITY TrailerConnect Telematics  
for Refrigeration Units and Trailers

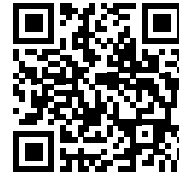

# Smart and sustainable trailer technology that increases your bottom line

Already standard on Cargobull TRUs, UTILITY TrailerConnect UTC-BASIC and UTC-PRO telematics are the central nervous system of your trailer and refrigeration unit of choice.

UTC-BASIC is a compact stand-alone unit that offers both the latest CAN bus connectivity to Bendix® TABS8 ABS as well as future expandability.

UTC-PRO is fully integrated into Utility Trailer 3000R® refrigerated trailers equipped with a Cargobull TRU.

With the UTILITY TrailerConnect portal and app, all trailers appear in the same workspace. Additionally, telematics data can be forwarded directly to alternative frontend providers or received and provided to transport management or ERP systems.

# *Remotely monitor critical elements of the trailer with fully integrated telematics.*

## Trailer Geolocation

Reduce calls between driver and dispatch and see route deviations immediately. Real-time display of truck & trailer position is available 24/7 with trailer geolocation.

## Load Display

Coordinate and optimize loads better. With load display, you can more easily prevent overloading.

## Trailer Air Leak Alerts

Invisible air leaks can result in higher energy costs, overheated brakes, and damaged suspension. Low trailer air pressure alerts inform that a repair is needed.

## Tire Pressure & Brake Maintenance Alerts

Real-time alerts for tire pressure and brake maintenance inform you of service needed at an early stage to help decrease and plan downtime.

## RSS Events

The system logs and displays RSS events along with ABS faults.

## *Increase profitability and reduce your carbon footprint with TRU telematics.*

### **Door Controls, Alarms, & Load Geofencing**

Protect cargo from unauthorized access with a PIN-secured door locking system. Geofence loads to restrict access to freight in defined zones. Set alarms to inform you of unauthorized door opening.

### **Temperature Monitoring & Control**

Protect sensitive goods and maintain compliance with temperature requirements. Monitoring capabilities and warning messages help you maintain consistent temperature.

### **Alerts & Predictive Maintenance for the TRU**

Prevent refrigeration unit failures that lead to product damage. With alerts and predictive maintenance, you can plan better.

### **Battery & Fuel Status**

Knowing the battery charge and fuel status gives ample time to plan and ensure the proper temperature can be maintained as needed during hauls.

### **Remote Timer, Start & Cargosets**

Pre-cool, maintain the optimal temperature, and save energy with remote start, timer and predefined cargosets.

### **24/7 Software Updates For Fleets**

Update cargosets and Cargobull software across your entire fleet in seconds.

## *Dispatchers manage trips more efficiently.*

- All information at a glance in the UTILITY TrailerConnect portal for efficient trip planning
- Remote access to TRU and trailer with transport data available at any time
- Trip monitoring, including subcontractor trips
- Respond more quickly to events, such as correction of set points
- Automatic recording trips from the start

***Fleet managers are  
always up to date.***

- Fast and digital availability of documentation, such as temperature records
- Optimal selection of the right vehicle and equipment, including certificates, documents, and reports
- Monitoring transport orders clearly and centrally in one platform
- Fast communication if you have any questions

**STAY INFORMED ON THE GO WITH THE  
CONVENIENCE OF OUR beUpToDate APP**

***Drivers know the  
trailer status and  
can react quickly.***

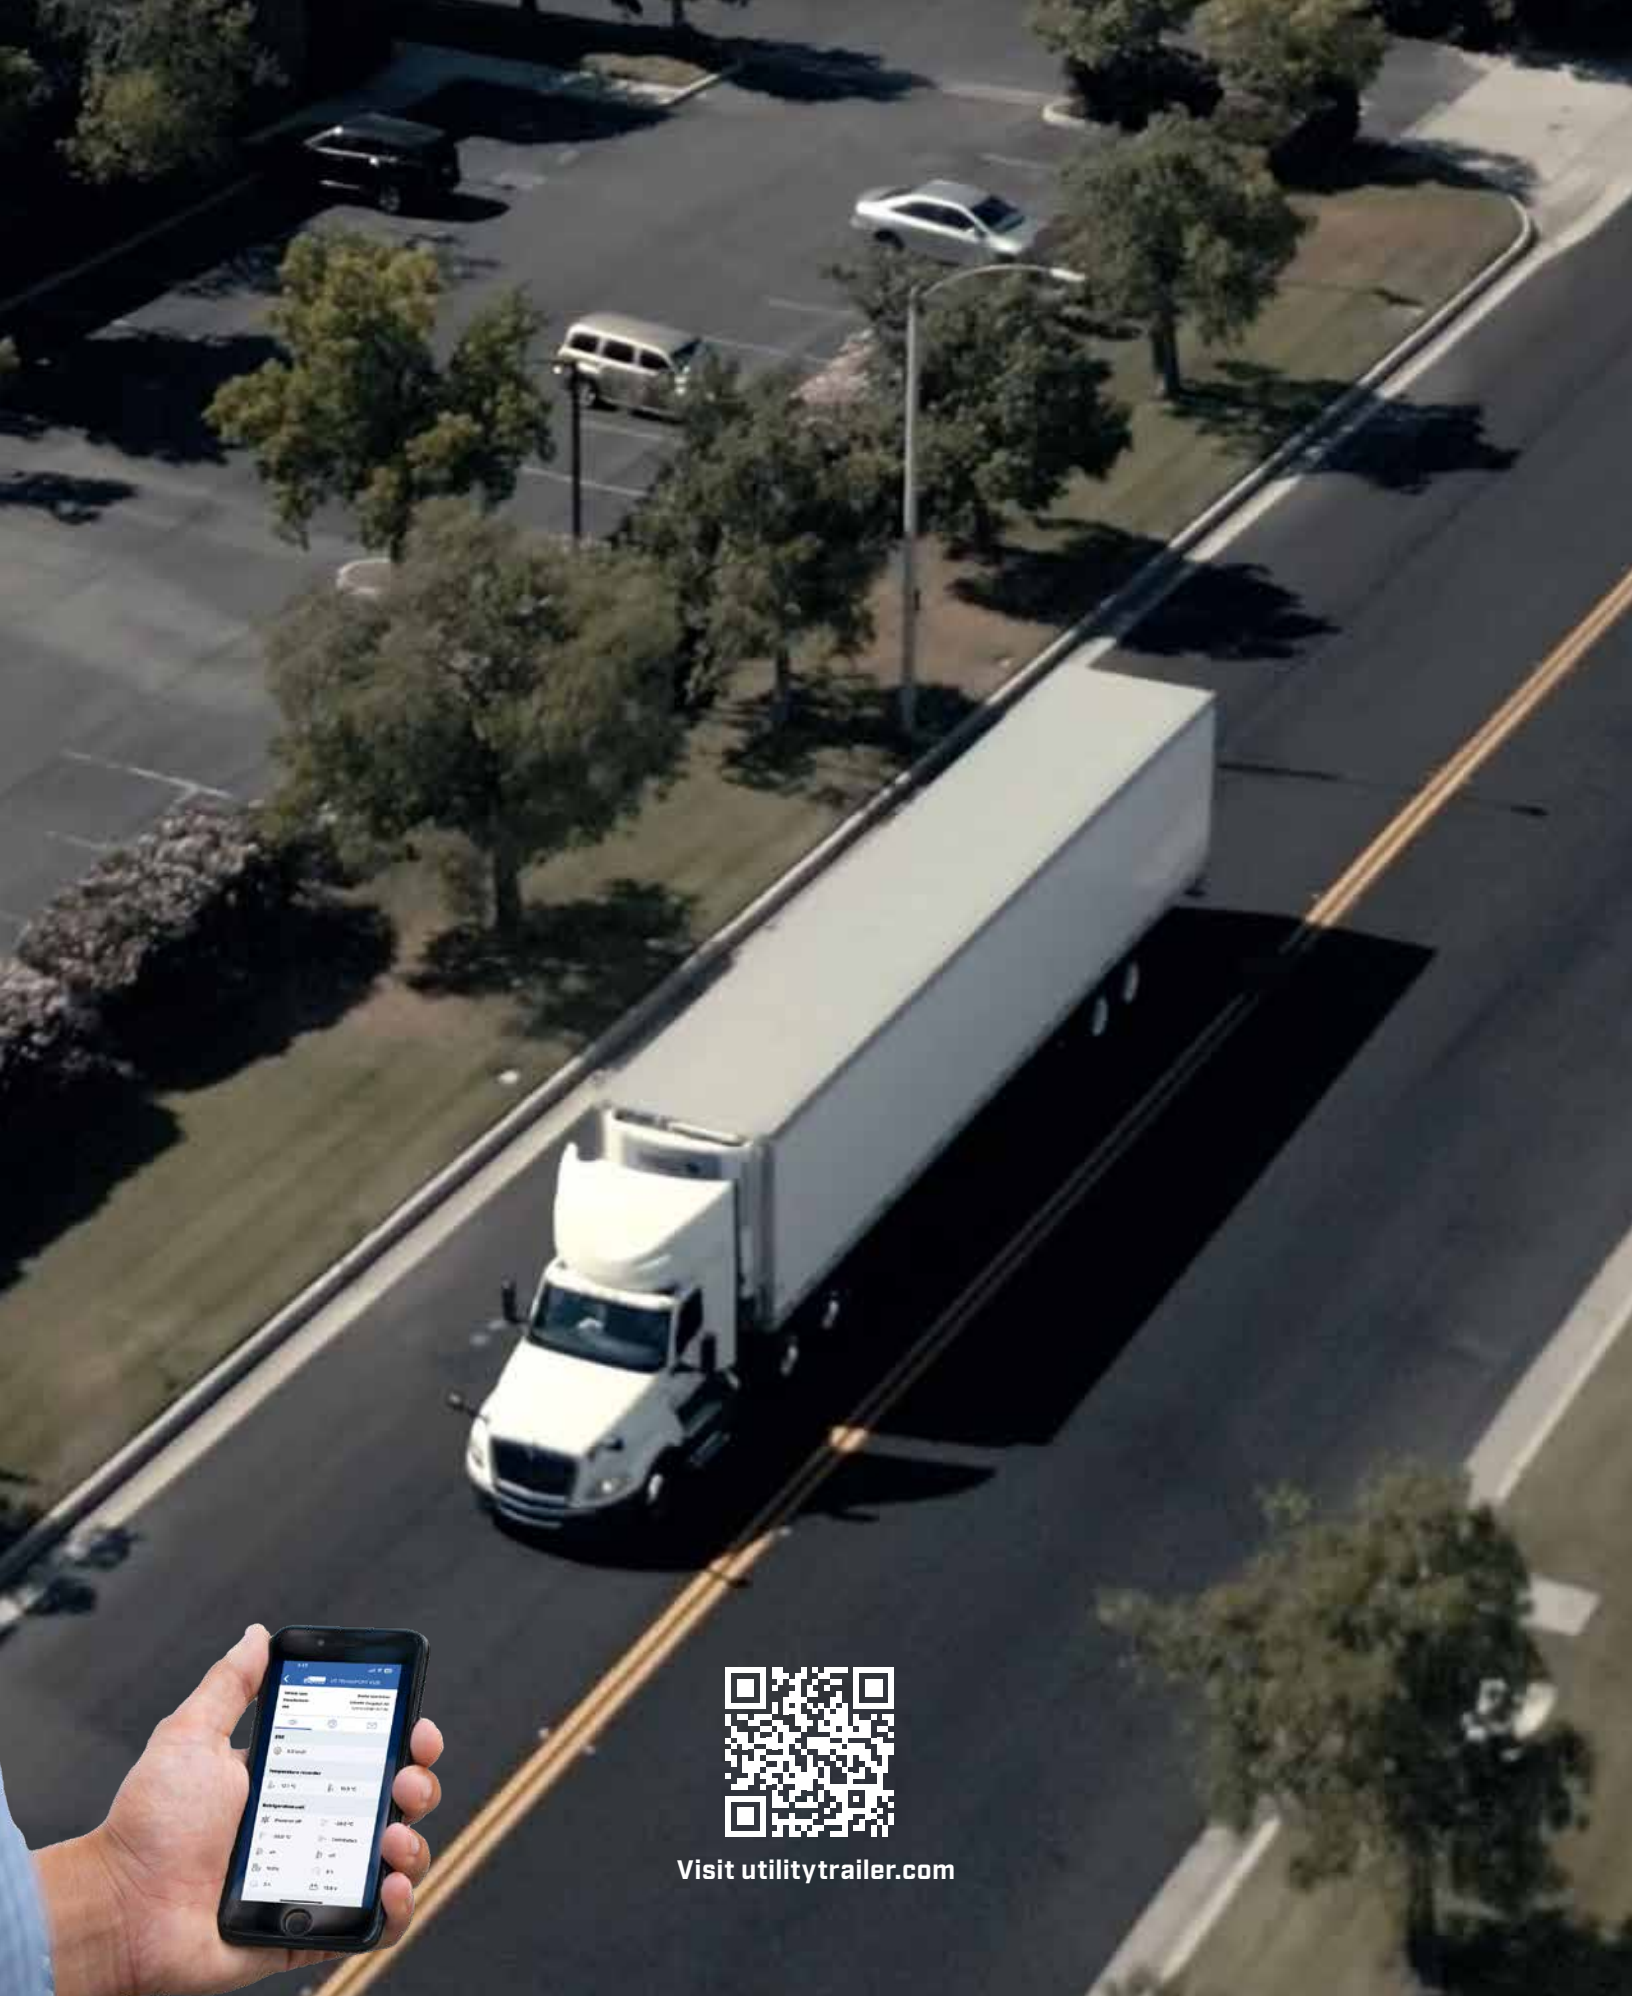

- Efficient communication between drivers and dispatchers with all information centrally located
- Improved concentration on transport through pre-settings on the refrigeration unit
- Timely warning of malfunctions and impending failures, avoiding breakdowns
- Optimized route planning by determining the expected arrival time (ETA), taking driving times into account

**STAY INFORMED ON THE GO WITH THE  
CONVENIENCE OF OUR beSmart APP**
