PRODUCT UPDATE

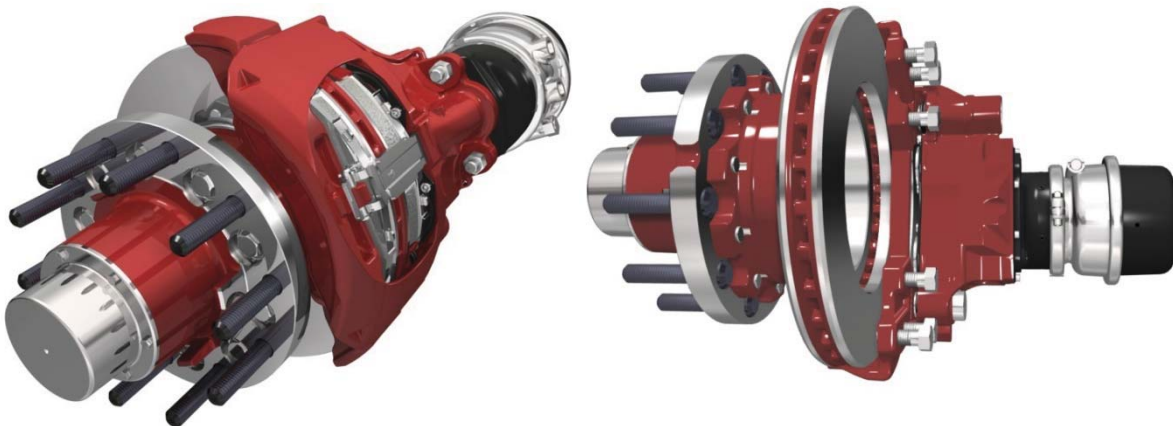

WHEEL SEAL CHANGE ON NON-PRESET AIR DISC BRAKE SPECIFICATIONS

LIT NO: P76001

DATE: November 2010

Hendrickson Trailer Suspension Systems is pleased to announce a wheel seal upgrade on ADB (Air Disc Brake) specifications. Effective immediately, the premium National Oil "Gold Seal" from Federal-Mogul will be the standard wheel seal in all ADB specifications (excluding ConMet PreSet ADB hubs*) shipped on Hendrickson INTRAAX[®], VANTRAAX[®] and most trailer axle models, including TRLAXLE[™]. This ADB wheel seal upgrade is compatible with all three ADB systems available from Hendrickson: Knorr/Bendix ADB22X, Haldex DB22LT and WABCO PAN22.

The premium "Gold Seal" incorporates a PTFE (Teflon) main sealing lip that provides superior heat resistance making it a perfect match for ADB wheel-end applications, as ADBs can operate at higher temperatures than drum brakes, particularly during frequent brake applications. As a result, all new ADB orders for Hendrickson INTRAAX, VANTRAAX and TRLAXLE model numbers will be configured with the "Gold Seal". Existing model numbers will be changed to incorporate the "Gold Seal".

This wheel seal upgrade is another example of Hendrickson's commitment to continuous improvement to enhance the value and lifespan of your equipment. For additional information on the "Gold Seal", contact Hendrickson or refer to these web site addresses:

If you have any questions, please notify your trailer account manager or call 1-866-RIDE-AIR (866-743-3247) and ask to speak with your customer or technical service representative.

* ConMet PreSet ADB hubs come equipped with ConMet-approved wheel seals pre-installed in their assembly.
