It Stands Alone
The 3000R® continues its unprecedented track record of excellence

The 3000R reflects our timeless pledge to engineer reefers of unrivaled quality that improve your business outcomes.

3000R®

Our base spec reefer is a platform for rising standards. It continues to deliver a high level of thermal efficiency, and innovative features are continually added to improve performance.

3000R® Multi-Temp

Built with the same industry-leading technologies found on the 3000R, the 3000R® Multi-Temp offers your business several custom options to meet your unique operational requirements.
Foam Mandrel Foam-In-Place Insulation
Foam-in-place insulation provides 360-degree foam to ensure that the entire trailer is fully insulated, 100% void free. With no joints to foam later, this process delivers optimum thermal efficiency.

Utility-Designed Rear Barrier Door®
The bonded foam “sandwich” design improves thermal performance and provides a tight seal. External “hat” sections mount all door hardware without “thru-holes” into the internal foam cavity, reducing moisture entry points, keeping the foam dry, and optimizing thermal performance.

.065” Versitex®-Utility VR2 Lining
Utility’s standard high impact lining on the complete interior reduces maintenance costs. The highly durable, moisture resistant lining wards off damage from forklift impact, keeps the foam insulation dry, and reduces overall heat loss of the trailer.

Bendix® TABS-8 Advanced with Trailer Roll Stability Program
Trailer roll stability technology improves trailer safety. It combines anti-lock braking (ABS) with a set of trailer sensors that monitor stability and automatically trigger braking intervention when detecting conditions that may lead to trailer rollover.

20K Aluminum Duct Floor System
The aluminum high wear duct floor system has a 20,000 lb capacity with full-length hardwood floor fillers from sustainable sources that give added support for optimum performance. Aluminum I-cores at the rear 36” and its exclusive bearing “grid” system, provide extra support in the critical dock to trailer transition.

Hendrickson® ULTRA-A-K® 40K Air Ride 8 Slider System
A heavy-duty slider box that includes the Quik-Draw® air-operated pin pull mechanism, improves load protection and lowers tare weight. Zero Maintenance Damping® (ZMD®) technology with shockless ride provides added driver comfort. Also standard is 96” of slider travel for increased versatility in load distribution and sharp turning radius conditions.
Find out more about the quality that is built into every Utility reefer.
Precise Variations of Cold

Get optimum thermal efficiency for more than one type of load

When you are shipping various temperature sensitive products all in one load, our 3000R Multi-Temp delivers tremendous value. Numerous options are available that enable you to configure this reefer to meet your specific business applications. Count on the 3000R Multi-Temp to deliver a high level of thermal efficiency zone by zone.

CenterSeal® Load Partition Device
The thermally efficient CenterSeal load partition device allows for multiple zones inside a trailer for increased load versatility and efficiency.

Multi-Temp Load Partition Systems
Multiple trailer compartment configurations protect temperature sensitive cargo and increase trailer utilization for better operational efficiency.
Get an up close look
Take a 360° tour of the 3000R.
The 3000R is a continuing promise to our customers. We will engineer strong, lightweight refrigerated vans that will help you to be more productive and profitable. And, we will build them to deliver a higher level of thermal performance available on the market today and tomorrow.

Our promise is to also give each customer a higher return on their investment, through a lower total cost of ownership, a higher resale value, and a better overall ownership experience.

From its exterior skin to every exacting detail inside, under and above, you can count on a Utility refrigerated van to simply be a better business decision.

Every idea is put to the test
We put every trailer design through rigorous testing on our proprietary and industry exclusive torture test track. This is how we keep our promise that every Utility trailer will deliver ongoing exceptional performance in the real world.

Our Business is to Better Yours

Everything we do, from design to manufacture is to provide you with products that optimize efficiency, lower costs, and deliver a long life cycle.

It embodies excellence
Our philosophy of continuous improvement has made the 3000R the most trusted refrigerated van in history. The technology that is continually integrated into the 3000R ensures that it maintains its leadership in optimizing thermal efficiency and performance.

We design for adaptability
Specialization is a core competency. We’ve invented an extensive array of value-add options that optimize efficiency, and with thousands of possible configurations, we’ll customize a reefer to profitably achieve your business objectives. Whatever you require, from weight saving technologies to highly custom, multi-temp food distribution options, we’ll build reefers specialized for your unique applications.

Return on investment
A Utility reefer has historically retained its value better than others, commanding higher prices in the secondary market. Its strong, light weight, and thermally-efficient design contributes to reducing maintenance costs and lowering ongoing operating expenses.
