

Options to improve your capabilities

Our standard combo flatbed has the features that many need to be productive. Yet you may have unique applications that require enhanced performance, durability, efficiency, and safety. Here are several options to meet your business requirements.

■ Adjustable Load Securement System (ALSS)

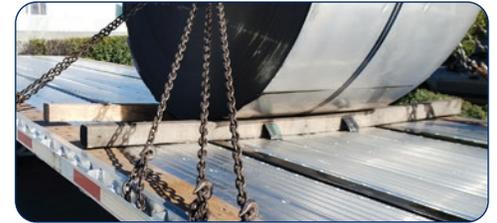

Aluminum side rails feature the integral ALSS tie-down track and sliding winch track. Movable J-hook tie-down plates provide on-the-deck load securement and can be stored on an optional formed channel attached to the main beam.

■ Sliding winches

Integrated into the extruded aluminum side rails on both sides of the flatbed, sliding winches are designed to increase load securement versatility.

■ Multiple coil haul package

Coil packages from 50,000 lbs to 57,000 lbs are available to match your specific requirements.

■ Factory-installed D.O.T. & non-D.O.T. rated bulkheads

Choose from our D.O.T. rated aluminum or steel bulkheads. Non-D.O.T. rated bulkheads are available in weld-on or bolt-on designs.

■ Factory-installed Conestoga XP[®]

Simple to operate, Conestoga XP offered by Utility is a sliding tarp system that protects loads from the elements without costly and time-consuming tarping.

■ Additional nailing strip

A third nailing strip is available for increased cargo securement versatility.

■ Tire inflation systems

Choose one of our recommended systems to maintain optimum tire pressure in order to increase fuel economy, improve safety, and maximize tire life.

■ Tri-axle suspension systems

Tri-axle suspension options with 49", 60" and 72" spread axles provide higher payload capacity.

■ Extra lights for increased visibility

Increase visibility and improve safety by putting lights exactly where you want them.

■ Tool boxes

Most manufacturers and styles are available and will be factory-installed.

■ Custom color paints

A variety of paint colors for your flatbed are available.

■ Clearance light packages

An array of LED clearance light models and configurations are available to meet specific applications of your operation.

■ Extra pipe spools

Additional pipe spools can be added to provide increased load protection.

■ Factory-installed dunnage rack

Rated for 500 lbs of dunnage load, this convenient storage solution improves productivity.

■ Spring suspension

Spring suspension is a light weight option to increase payload, reduce maintenance and lower overall costs.

■ Suspension location

Suspension locations can be moved to meet local restrictions or operational requirements.
