

OPTIONS

Our base model dry van is engineered with standard features that set it apart. Yet you have unique applications that require enhanced performance, durability, efficiency, and safety. We offer numerous options to take each to a higher level.

■ Aluminum & steel side wall post

Alternating steel and aluminum side wall posts reduce weight and deliver a higher payload capacity.

■ Custom wearbands

Multiple heavy-duty aluminum, fiberglass reinforced plastic and HDPE plastic options are available to fit your operation's durability requirements.

■ Stainless steel I.C.C. bumper

Stainless steel vertical and 7" deep, 8-gauge horizontal bumper provides superior strength and protection. Corrosion resistant and easy-to-clean, it increases resale value and extends trailer life.

■ Approach plate reinforcing angle

The approach plate reinforcing angle gives added front wall protection, reducing maintenance costs while promoting longer trailer life.

■ Heavy-duty aluminum floors

A heavy-duty, light weight aluminum floor is durable, delivers added payload capacity, reduces trailer weight, and extends floor life.

■ Composite floor systems

Built with a fiberglass layer on the underside of each plank, the high strength composite design supports heavier payloads and decreased moisture entry into the floor.

■ Translucent roof skins

A fiberglass reinforced plastic roof skin heightens visibility inside the trailer, improving safety and efficiency during loading and unloading.

■ Severe service kingpin section

Engineered with a thicker approach plate and kingpin plate, this design minimizes damage during heavy-duty service operations, reducing repair costs.

■ Roll up door installations

Utility offers roll up doors from most manufacturers to meet the unique applications of your operation.

■ Double deck solutions

Optimize trailer payload capacity by efficiently using the full inside height of the trailer—increasing cargo versatility and transportation efficiency.

■ Skylights & domelights

Skylights and domelights enhance interior trailer visibility, improving safety and efficiency during loading and unloading.

■ Pintle hooks/doubles

For better operating efficiency, pintle hooks are available for single axle, turn pike double and Canadian C-Train style dual pintle hook trailer operations.

■ Bendix® TABS-8 advanced with trailer roll stability program

Trailer roll stability technology improves trailer safety. It combines anti-lock braking (ABS) with a set of trailer sensors that monitor stability and automatically trigger braking intervention when detecting conditions that may lead to trailer rollover.

■ Air disc brakes

Disc brakes reduce brake fade, increase braking performance and improve safety—creating shorter, more stable stopping distances. With an extended service life, it lowers maintenance costs and downtime.

■ EPA SmartWay® certification

A SmartWay certification decal makes it easier to identify a trailer as CARB-compliant, creating less paperwork and downtime at checkpoints.

■ Clearance light packages

An array of LED clearance light models and configurations are available to meet the specific applications of your operation.

■ Tire inflation systems

Choose one of our recommended systems and maintain optimum tire pressure in order to increase fuel economy, improve safety, and maximize tire life.

■ Anti-dock walk devices & dump valves

A variety of anti-dock walk devices and dump valves are available to stabilize the trailer during loading/unloading, creating a safer work environment.

■ Tri-axle suspension systems

Tri-axle suspension options with 49", 60", and 72" spread axles provide higher payload capacity.

■ Stainless steel electropolished lock rods

Electropolished stainless steel produces a corrosion resistant, easy-to-clean polished finish for improved appearance and increased resale value.

■ Factory-installed decals

High quality decal installation is available and completed at our factories so your trailer is ready to operate as soon as you pick it up.

■ Utility Aerodynamic Tail 2

The patented Utility Aerodynamic Tail 2 is part of a complete system with the Utility Side Skirt to reduce fuel consumption and aerodynamic drag.

■ Factory-installed lift gates

Utility offers high quality lift gate installation from most manufacturers providing you with a fully operational trailer direct from the factory.

■ Exterior rub rails

Constructed from heavy-duty aluminum, they protect the exterior side skin from casual damage, reducing maintenance costs.
